Summary

Full-stack software engineer with 11 years of combined experience in software development, technical delivery, and government contracting. Experienced in building and supporting customer-facing and mission-critical web applications across healthcare, federal, and private-sector environments. Skilled in Ruby on Rails, React, JavaScript, Python, and Django, with added experience in project management, stakeholder coordination, and cross-functional delivery.

Skills & Tools

Programming Languages: JavaScript, HTML, CSS, SCSS, Ruby, Python, TypeScript, SQL
Frameworks and Libraries: Ruby on Rails, React, jQuery, Turbo, Stimulus
TestingFrameworks and Libraries: RSpec, Minitest, Pytest, jest
Platforms: LaunchDarkly, Monetate, Honeybadger, Adobe Analytics, Salesforce Commerce Cloud, Drupal, Wordpress, Strapi
Project Management Framework: Agile principles, Scrum framework
Data and Messaging: PostgreSQL, MySQL, RabbitMQ, REST APIs
Cloud, DevOps and Other Tools: AWS, Docker, Figma, Webflow, Git, Node Package Manager, Salesforce Commerce Cloud, Bash Scripting

Professional Experience

Brooksource (MDLive) — November 2025-Present

Senior Software Engineer

- Develop and maintain a multi-application healthcare platform supporting Patient Portal, Provider Portal, and Affiliation Management systems, built primarily with Ruby on Rails and React.
- Contributed to AI-powered developer tooling that integrates Claude with Jira to automate ticket-driven code generation and pull request creation, while using Cursor and Claude Code to support day-to-day software development.
- Deliver full-stack features across patient-facing experiences, including service discovery, appointment workflows, and provider search.
- Implement LaunchDarkly feature flags and A/B testing, establishing patterns for controlled feature rollouts across web and mobile clients.
- Build and enhance reusable React components, improving UI consistency, accessibility, and performance.
- Contribute to the Rails-based Stern application through backend development, RSpec test coverage, and refactoring to support new patient features.
- Investigate production errors using Honeybadger and improve application reliability through debugging and root-cause analysis.
- Identify performance bottlenecks, including N+1 queries and inefficient data loading, in provider search and listing features.
- Implement database migration and seeding workflows using tools such as AfterParty.
- Contribute to email and SMS notification workflows, including testing RabbitMQ-driven appointment reservation change events.
- Collaborated with mobile, QA, product, and analytics teams on testing, debugging, accessibility, analytics integration, and production validation.

Amentum (Formerly: Jacobs Engineering) — February 2020 – October 2025

Senior Web Developer

- Developed and maintained major features for a large-scale Ruby on Rails Learning Management System, working across Models, Views, Controllers, API integrations, and automated test coverage.
- Led the integration of a Drupal CMS into a Rails 6 platform, designing the data ingestion pipeline, content synchronization logic, authentication, and frontend rendering.
- Wrote database migrations, automate data movement, and manage schema evolution for multiple Rails applications.
- Developed data management application using React for front end and a Django backend.

Jesse D. Shaw

JesseShawCodes@gmail.com ▪ 410.703.6125 ▪ Explore more of my work: Portfolio Link

- Implemented test suites using Minitest, Pytest, and Jest to ensure high-quality, testable, maintainable code prior to deployment.
- Streamlined application deployments to AWS infrastructure through collaborative efforts with DevOps teams, leveraging GitLab CI/CD for automated builds and releases.
- Collaborate closely with cross-functional teams—including UX, backend engineers, and product stakeholders—within an Agile environment (daily standups, sprint reviews, retrospectives).

SOUTH MOON UNDER — OCTOBER 2018 – JANUARY 2020

Web Developer

- Served as the sole developer responsible for the company's e-commerce website, independently managing technical implementation, troubleshooting, and ongoing platform enhancements using Salesforce Commerce Cloud.
- Acted as the primary technical point of contact for website issues, independently diagnosing problems and coordinating solutions across business and platform dependencies.
- Partnered with design, marketing, and operations teams to deliver pixel-perfect UI implementations and advise on accessibility, responsive design, and user experience best practices.
- Improved SEO and site performance through structured data, metadata optimization, lazy loading, and template enhancements.
- Designed and tested A/B experiments using Monetate, contributing to a 10–15% lift in conversion rate and a 15–20% increase in revenue per session.
- Managed and optimized Commerce Cloud integrations supporting product feeds and payment workflows, helping maintain reliable e-commerce operations.

JESSE SHAW CODES (FREELANCE) — MAY 2018 – PRESENT

Freelance Web Developer

- Developed React.js web applications to make desktop applications mobile friendly and implemented application functions using Redux.
- Integrated RESTful APIs in React.js application to enhance functionality and improve the user interface with real-time data fetching.
- Developed custom Wordpress themes incorporate client branding to ensure responsive design across all devices.

LAUNCHCODE (CONTRACT) — OCTOBER 2018- MARCH 2019

Web Development Java Instructional Assistant

ANNE ARUNDEL COUNTY PUBLIC SCHOOLS — JANUARY 2017 –OCTOBER 2018

Substitute Teacher

OPTIMAL SOLUTIONS GROUP — SEPTEMBER 2013 DECEMBER 2016

Project Manager

- Managed project activities and budget for a contract with the U.S. Small Business Administration.
- Effectively controlled personnel, materials, and equipment to manage the project budget. Tracked monthly use against budget projections to manage burn rates.
- Identified project risks, assessed impact to the schedule and budget, and developed mitigation strategies.
- Managed the development and prompt submission of key deliverables.
- Coordinated and facilitated client meetings and working sessions with key stakeholders.
- In 2016, Created and launched the National Women's Business Council's GROW Her Business website built with WordPress.
